

# Air Plant Display Tutorial

## Supplies

- Tillandsia “air” plants
- Air plant holder
- Scissors
- Bowl
- Filtered water
- Ribbon, if needed
- Sand or stones, if needed
- Clear Bead ‘n Stretch Cord, if needed
- Ceiling hook, if needed
- Mister filled with filtered water

## Instructions

### *Prepping your air plants*

1. Fill a bowl with filtered water and submerge your plants to hydrate them.
2. Pull out the plants and air dry them on a tea towel.

### *Create a holder*

3. Air plants don’t require soil, so chose any container that sparks your imagination!
4. If your holder resembles a cup or planter, fill it with sand or stones to elevate the tillandsia.
5. If your holder is more free form, you may need to string lines with the stretch cord to hold the plant.
6. Attach a ribbon to the plant holder if you want to hang it.
7. Place your air plant in the holder and hang it in a place with filtered, not direct, sunlight.

### *Air plant care*

8. Mist your air plant every 2-3 days.
9. If misting is not keeping your tillandsia hydrated, soak them in filtered water for up to 8 hours.
10. If your plants start to look tired, see our post for product suggestions in our blog post.
